Chronic Care - Chronic Care Clinic encounter performed at Health Services.

SUBJECTIVE:

COMPLAINT 1 **Provider:** Trueblood, Elizabeth MD

Chief Complaint: Chronic Care Clinic

Subjective: Chronic care clinic

Hypertension. Patient's blood pressure is in good range. He had an episode of dizziness which resulted in a liter of fluid given. States that he thinks he had "a bug". States he feels much better now. States that his urine is now white-yellow incident of dark yellow. Denies any chest pain, shortness of breath, or dyspnea on exertion. Chest x-ray 06/2017 showed a nodule in the left lung. CT scan was performed which showed a calcified nodule representing remote granulomatous disease.

Pulmonary. Patient states he gets around well. He states he was unaware he had emphysema. This was diagnosed previously in 2015 by a CT scan. Patient denies any exertional dyspnea or cough productive of sputum. States he occasionally uses his albuterol. He denies any nocturnal cough.

Orthopedic. Gout is under good control on allopurinol. Denies any issues at this time.

General. Reports he is taking his folic acid regularly. Labs reviewed and show that his vitamin D is low at 17. He is on calcium with vitamin D which she reports he is taking regularly however it is still low.

Patient is also complaining about sore spots in his ears from his hearing aids. He has been using triple antibiotic ointment from the commissary on a Q-tip which has helped heal his right side but his left side is still sore. He states he still has occasional drainage. He feels that it is swollen.

Review of systems otherwise negative.

Pain: No

Chronic Care - Chronic Care Clinic encounter performed at Health Services.

SUBJECTIVE:

COMPLAINT 1 **Provider:** Trueblood, Elizabeth MD

Chief Complaint: Chronic Care Clinic

Subjective: Chronic care clinic

Cardiac/hypertension. Patient reports he is doing very well. Denies any chest pain, shortness of breath, dyspnea on exertion. Has been recently evaluated by cardiology and report states that he is stable.

Chest x-ray 06/2017 slightly torturous aorta without radial graphic evidence for acute cardiopulmonary process. 67 mm nodule in the left upper lobe anteriorly. Follow-up chest CT was ordered which showed small calcified pulmonary nodules as well as mediastinal calcified lymph nodes.

EKG 06/2018 sinus rhythm

Diabetes. Patient is currently not on medication. Stacy Clint rolls his diabetes with diet and exercise. However A1c has risen and now is at 7.4%. Stacy was on metformin previously and did not have any problems with this.

Patient is currently taking calcium with vitamin D. He had DEXA scan August 2018 which shows osteopenia.

Gastrointestinal. Patient had colonoscopy last summer and had about 15 COLON Polyps. One was a tubular adenoma. The GI doctor did not recommend follow-up but the patient states that the GI doctor told him it would be sooner than 3 years.

His only other concern is regarding TED hose. He states that his left calf is much larger than his right due to previous vein stripping. He was seen by Hanger and custom hose was ordered however those does slide down his leg and does not seem to compress as well as the Jobst hose. He is wanting new hose.

Review of systems otherwise negative.
